Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-2, 5-11, 13-15, 17-20, 22-29, 31-33, 35, 37-40, 43-46, drawn to communication between objects with corresponding reaction, classified in class 342, subclass 357.11.
 - II. Claims 48-50, 53-55, 57-62, drawn to calculating object location using dead reckoning and last known GPS position, classified in class 701, subclass 216.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions group I and group II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because activating an appropriate reaction of a vehicle depending on the position of the vehicle does not requires a special method for determining the position of the vehicle using dead reckoning devices and the last GPS position. The subcombination has separate utility such as improving accuracy in determining location of a vehicle.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3661

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Remark

Claims 44-46 depend on the canceled claim 42. The claims should be amended to be dependent on claim 43 instead.
